Medicaid recovery is not limited to nursing home care; in Maryland recovery is for ALL services on or after age 55

Office on Aging should be included; hospitals and community health care centers

Reena that was incredibly helpful thank you for sharing that insight and speaking truth to power.

More ideas to consider- what representatives do we have from immigrant serving organizations. Maryland has a growing immigrant population where there are many aging citizens that typically do not utilize these kind of mainstream services.

reaching out to faith leaders, immigrant resource centers, etc would go a long way to help with reaching out to these groups
